

Finding Your Stellar150™ Device Number

In order for the Ventilator Equipment Pool to connect your Stellar150™ to ResMed AirView™ we will be contacting you for the Device Number found on your device. The Device Number for your Stellar150™ can be found in the information menu of your device. Follow the instructions below to find this number. You may wish to write down the number for when we call you, however if you have any difficulty finding this number we will guide you through the process when we contact you by phone.

With your Stellar™150 turned on, push the “info” button, found to the right of the screen. Continue to push the button until page 11 is shown. You can find the Device Number on this page. In this case, the device number for this Stellar™150 is **110**. To exit from this screen and return to therapy, push the Monitor button.

Each Stellar™150 will have its own unique Device Number. Your device will have a different number. This number will allow us to identify your equipment to allow us to connect your device to the ResMed AirView™ program.

Where multiple Stellar™150 exist in your home, we will ask for this number from both of your Stellar™150 devices, and with your help identify which is your “main device” and which is your “backup device”. Remember, only one device can be connected to the RCM™ for remote data download at a time.
